PROFESSIONAL SUMMARY

UX/UI Designer with hands-on experience assisting in the design of user-friendly interfaces for web and mobile applications — creating wireframes, mockups, prototypes, and high-fidelity UI designs in Figma. Practiced in building design systems and reusable components that maintain consistency across product interfaces. Comfortable working closely with product managers and developers, conducting basic user research and usability testing, and supporting branding and visual design tasks. Strong understanding of color theory, typography, layouts, and UX/UI principles. Creative thinker with sharp attention to detail and genuine eagerness to learn, grow, and contribute to real enterprise-level products.

SKILLS

Figma (Expert): Wireframes, mockups, prototypes, high-fidelity UI, design systems, reusable components, style guides, developer handoff — practiced across multiple shipped products

UX/UI Design Principles: User-centered design, color theory, typography, layout composition, visual hierarchy, usability basics, interaction design

Wireframing & Prototyping: Low to high fidelity wireframes, interactive clickable prototypes across desktop, tablet, and mobile breakpoints

Design Systems & Reusable Components: Building scalable, component-based systems in Figma — token-based color and type systems, reusable components, spacing grids

Mobile App Design: High-fidelity mobile UI design — applied Cupertino and Material Design principles across shipped mobile projects

User Research & Usability Testing: Conducting basic user research, gathering feedback, usability testing with real participants, iterating designs based on findings

Branding & Visual Design: Social media creatives, marketing materials, brand-consistent visual assets — supporting branding tasks alongside UI work

HTML/CSS Basics: Working knowledge of HTML5 and CSS3 — enables technically feasible designs and smooth collaboration with developers

Communication & Teamwork: Works closely with product managers, developers, and stakeholders; participates actively in reviews; takes feedback constructively

AI Design Tools: Claude AI, ChatGPT Pro, Lovable, Adobe Firefly — AI-assisted design workflows for ideation and production acceleration

EXPERIENCE

UX/UI Design Intern | VS Kart · *Internship · Remote* 2025

- Assisted in designing user-friendly interfaces for a web platform — created wireframes, mockups, and high-fidelity Figma prototypes across desktop and mobile.
- Built a complete design system and reusable component library from scratch, maintaining consistency across all product interfaces throughout the project.
- Worked closely with developers to ensure smooth implementation — provided annotated Figma handoff specs and reviewed live screens. Approved with zero revisions after Round 2.

UX/UI Design Intern | Emilio Beaufort · *Internship · Remote* 2025

- Assisted in designing web and mobile interfaces — wireframes, mockups, and prototypes in Figma, iterated based on feedback across multiple rounds.

- Supported branding and visual design tasks — created marketing creatives and visual assets in Photoshop alongside UI work.
- Maintained consistency with design system and brand guidelines across all screens. Approved with zero revisions after Round 2.

Design Lead | KARE ACM-W Chapter, Kalasalingam Academy · *Part-time · On-site* 2024

- Designed web UI screens, digital banners, and visual materials for chapter initiatives reaching 500+ users — maintained consistent design system and visual brand standards throughout.
- Conducted a full-day UX/UI design workshop for 300+ junior students covering design principles, wireframing, Figma, and usability basics — followed by a live design competition the next day.

PORTFOLIO — UX/UI DESIGN PROJECTS

COREX AI — [AI SaaS Platform](#) · [Web App](#) 2025

Figma, Claude AI, ChatGPT Pro

- Assisted in designing an AI workspace platform end-to-end — wireframes, user flows, high-fidelity Figma UI, and a 30+ component design system with complete developer handoff documentation.
- Case study: ai-powered-product-designer.vercel.app/work/corex-ai

CHEEZY CRUST — [Mobile App](#) · [Food Ordering](#) 2024

Figma, Adobe Photoshop

- Designed a mobile ordering app from scratch — information architecture, wireframes, high-fidelity Figma UI with a 30+ reusable component system; conducted usability testing with real users and iterated all flows.
- Case study: ai-powered-product-designer.vercel.app/work/cheezy-crust

VOIDCODE — [SaaS Platform](#) · [Developer Tool](#) 2025

Figma, Claude AI

- Designed a design-to-code SaaS platform — wireframes, user flows, and high-fidelity responsive UI with complete component documentation for developer handoff.
- Case study: ai-powered-product-designer.vercel.app/work/voidcode

CYBERSHIELD & PRO — [Enterprise Dashboard](#) · [Live Product](#) 2023–2024

Figma, HTML5, CSS3, JavaScript

- Designed and built a full enterprise web application — wireframes through high-fidelity Figma UI to a live HTML/CSS/JavaScript product — sole designer and front-end implementer.
- Live: cyber-shield-ai-six.vercel.app | Case study: ai-powered-product-designer.vercel.app/work/cybershield

EDUCATION

B.Tech — Computer Science & Engineering 2022 – 2026

Kalasalingam Academy of Research and Education, Tamil Nadu · Degree completed, provisional certificate received

Relevant coursework: Human-Computer Interaction, Web Technologies, Mobile Application Development, Information Systems, Data Structures
